Technical Skills

Languages: Java, JavaScript/TypeScript, SQL, HTML, CSS
Frameworks / Libraries: React, Jest/Vitest, React Testing Library, React Native, Expo, Redux, Gradle, Spring Boot, JUnit, Mockito, Next.js
Databases / Messaging: PostgreSQL, Redis, Kafka, Oracle
Tools / Misc: Node.js, WSL, Linux, IntelliJ, VSCode, Jira, Postman

Work Experience

Senior Software Engineer, Cubic Corporation Aug. 2022 - Present

- Reduced build time of a shared Java, Angular and React repository from 2.5 hours to 20 minutes, accelerating development for multiple teams
- Built an MCP server and React app that let developers and testers search microservice logs through AI tools or a simple UI
- Serving as primary developer of a new Java adapter service connecting internal microservices to a major transit agency's back office with no changes to the existing backend; own scaffolding, authentication and integration testing
- Led an Angular-to-React migration of a legacy management console from inception to production, cutting login-to-landing load time by 50%

Software Developer, Sentry Insurance June 2020 - Aug. 2022

- Owned development of a Java and Spring auto-liability reporting system that automated nightly policy reporting and supported regulatory compliance
- Integrated REST APIs for real-time policy retrieval and delivered a self-service workflow that replaced manager- and DBA-approved database scripts
- Modernized Java and Gradle services, removed circular dependencies, and improved on-call response through durable alert documentation

Product Experience

Creator | U-Stat | u-stat.app

- Designed, built, and released a cross-platform React Native and Expo application for live Ultimate Frisbee scorekeeping, line management, and player statistics
- Built basic and advanced tracking modes with playing-time, possession, throwing, and offensive/defensive conversion analytics, plus shareable team and game links
- Own product design, implementation, testing, performance tuning, and App Store and Google Play releases; continuously deliver new features and resolve platform-specific issues

Education

Milwaukee School of Engineering, Milwaukee, WI Sept. 2016 - May 2020
B.S. Software Engineering
